

Χαρακτηριστικά:

- **Expert content written by surgeons for surgeons**, overseen by co-editors and internationally recognised surgeons Peter A. Brennan and Sam Wiseman, with **all anatomical detail quality assured** by co-editor and *Gray's Anatomy* Editor-in-Chief, Susan Standing; section editors and contributors are global leaders in areas such as head and neck surgery, cardiothoracic surgery, and general surgery
- Features **superb colour photographs** from the operating theatre, accompanied by detailed explanatory artwork and figures from the latest imaging modalities, plus summary tables, dozens of cadaveric and intra-operative videos, up-to-date self-assessment questions, and case-based scenarios—making it **an ideal reference and learning package for surgeons and trainees at all levels**
- Reflects contemporary practice with chapters logically organised by anatomical region, designed for relevance to surgeons across a **wide range of subspecialties, practice types, and clinical settings**, and aligned with the requirements of current surgical training curricula
- Contains **new sections** on Surgical Anatomy Teaching: Evidenced Based Approaches; Moral Injury/Moral Damage; Endovascular Surgery; and Gender Reassignment Surgery/Transgender Surgery; as well as **enhanced coverage** of human factors and minimising error; the root of the neck; vascular anatomy; considerations relevant to robotic surgery; and much more
- Maximises **day-to-day practical application** with depictions of **key anatomical features and relationships** that are essential for safe surgical practice throughout, as well as clearly signposted “Tips and Anatomical Hazards”
- Integrates essential anatomy for **robotic and minimal access approaches**, including laparoscopic and endoscopic techniques
- Provides online access to **supplementary operative and cadaveric dissections videos and self-assessment material** to bring content to life, add further clarity, and test your understanding of key surgical anatomy concepts
- **An eBook version is included with purchase.** The eBook allows you to access all of the text, figures, and references, with the ability to search, make notes and highlights, and have content read aloud

Περιεχόμενα:

SECTION 1 INTRODUCTION

1. A short history of surgery
2. Understanding human factors to improve patient safety and team performance
3. Beyond location and function: the evolution of anatomy education for surgeons

4. Moral injury – the concept and its implications

SECTION 2 HEAD AND NECK

5. Overview of the head and neck
6. Facial bone osteology and nasoethmoidal complex
7. Face and scalp
8. Orbital anatomy
9. Orbit and eye
10. Nose and paranasal sinuses
11. Infratemporal fossa and pterygopalatine fossa
12. Temporomandibular joint
13. Mouth
14. Salivary glands
15. External and middle ear
16. Temporal bone
17. Neck
18. Pharynx
19. Larynx
20. Thyroid and parathyroid glands

SECTION 3 NEUROANATOMY

21. Overview of neurosurgical anatomy
22. Suprasellar and paraclinoid regions
23. Cerebellopontine angle
24. Foramen magnum and inferior clivus
25. Ventricular system
26. Cerebral hemispheres and white matter tracts
27. Cerebral vasculature
28. Basal ganglia and thalamus
29. Brainstem and pineal region
30. Spinal cord

SECTION 4 BACK AND SPINE

31. Overview of the back and spine
32. Intervertebral joints, foramina and ligaments
33. Cervical spine
34. Thoracic spine
35. Lumbar spine, sacrum and coccyx
36. Anatomy of lumbar puncture and epidural analgesia

SECTION 5 UPPER LIMB

37. Overview of the upper limb
38. Supraclavicular and infraclavicular regions
39. Axilla

- 40. Shoulder girdle and upper arm
- 41. Elbow and forearm
- 42. Wrist and hand

SECTION 6 THORAX

- 43. Overview of the thorax and diaphragm and surgical anatomy of the chest wall
- 44. Great vessels: surgical access
- 45. Oesophagus, thoracic duct and lymphatics
- 46. Pleura and thoracic sympathetic trunk
- 47. Lungs, bronchi and trachea
- 48. Thymus
- 49. Pericardium and pericardial drainage
- 50. Echocardiographic anatomy of the heart
- 51. Mitral and tricuspid valves
- 52. Aortic valve, aortic root, left ventricular outflow tract and pulmonary valve
- 53. Ventricles, coronary vessels and access to conduits for grafting
- 54. Breast
- 55. Endovascular surgery

SECTION 7 ABDOMEN

- 56. Overview of the abdomen
- 57. Anterior abdominal wall
- 58. Inguinal region
- 59. Posterior abdominal wall and retroperitoneum
- 60. The mesentery, peritoneum and peritoneal cavity
- 61. Abdominal oesophagus and stomach
- 62. Small intestine
- 63. Colon, rectum and anus
- 64. Liver
- 65. Liver biopsy, resections and a brief overview of transplantation
- 66. Pancreas, gallbladder and biliary tree
- 67. Spleen
- 68. Adrenal glands
- 69. Development and congenital anomalies of the gastrointestinal tract and its adnexae
- 70. Endoscopic anatomy of the gastrointestinal tract

SECTION 8 PELVIC VISCERA: UROGENITAL SYSTEM

- 71. Overview of pelvic viscera
- 72. Kidneys and ureters
- 73. Bladder and urethra
- 74. Pelvic inlet, pelvic floor and perineum
- 75. Male reproductive system
- 76. Prostate
- 77. Female reproductive system

- 78. Gender-affirming surgery/transgender surgery
- 79. Development and congenital anomalies of the urogenital system

SECTION 9 BONY PELVIS AND LOWER LIMB

- 80. Overview of the pelvis and lower limb
- 81. Vascular anatomy of the lower limb
- 82. Innervation of the lower limb and nerve blockade techniques
- 83. Pelvic girdle
- 84. Hip
- 85. Thigh
- 86. Popliteal fossa
- 87. Knee
- 88. Compartments of the leg
- 89. Ankle
- 90. Foot
